

Air-Cooled Jumpers

The WSI line of Air-Cooled Jumpers will meet your every welding requirement for this type of cable. Jumpers are available in circular mill sizes from 400 MCM to 2000 MCM as standards. Other circular mill sizes and extra-flexible cables are available on request.

Terminals can be furnished with any desired angle—see Terminal Standard Configurations below.

As standard and unless otherwise ordered:

1. The 1 1/2" width will be supplied up to and including 1200 MCM size.
2. The 1500 MCM size will be furnished in the 1 3/8" width.
3. The 2000 MCM size will be furnished in the 1 1/2" width.

Terminal Length: The contact surface length of Air-Cooled Jumpers is 1 9/16". Other lengths can be furnished if special ordered.

Bolt Hole Size: All Air-Cooled Jumpers are drilled with 17/32" bolt holes, unless otherwise ordered.

When ordering, please specify the ACJ/MCM size, length bolt hole center to bolt hole center, and the terminals required. If no terminals are specified, the CFF will be furnished.

MCM	1 1/4" Wide	1 3/8" Wide	1 1/2" Wide
400	3/8" Thick		
500	7/16"		
600	1/2"	7/16" Thick	
750	5/8"	9/16"	
1000	3/4"	1 1/16"	5/8" Thick
1200	7/8"	13/16"	3/4"
1500		1 1/16"	1.00"
2000			1 7/16"
